Professor H. Miles Prince

MBBS (Hons) MD MRACMA FRACP FRCPA

A Night Not to be missed

Partners and friends night and all guests welcome

Professor H. Miles Prince MBBS (Hons) MD MRACMA FRACP FRCPA

Professor Miles Prince is the Director of the Centre for Blood Cell Therapies at Peter MacCallum Cancer Centre, Melbourne, Australia and Director of the Blood and Marrow Transplant Service.

Professor Miles Prince is also appointed as haematologist at St Vincent's, Royal Melbourne Hospitals, Australian Red Cross Blood Service and Cabrini Hospital Department of Oncology. He is a Professor of Medicine at both University of Melbourne and Monash University .

Professor Prince is qualified as a clinician (Fellow of the Royal Australasian College of Physicians) and pathologist (Fellow of the Royal College of Pathologists of Australasia). He was awarded his research degree (Doctor of Medicine, Monash University) in 1998. He is a member of the American, Australian and European Societies of Haematology and Oncology. Professor Prince graduated from Monash University in 1986 and undertook physicians training at the Alfred and Austin Hospitals in Melbourne and completed his laboratory haematology training at the Royal Prince Alfred Hospital, Sydney. Prof Prince subsequently spent three years in Toronto, Canada examining laboratory research aspects of gene therapy in myeloma and gene transfer into blood stem cells.

During his time in Toronto, Miles Prince also completed a clinical fellowship in transplantation and was awarded the prestigious Edward Christie Stevens Fellowship in Medicine and the Postgraduate Fellowship Award for his work in multiple myeloma. Since returning to Australia in 1996, has been Head of Haematology at Peter Mac. His clinical expertise is malignant haematology - including lymphoma, leukaemia, myelodysplasia, myeloproliferative disorders, myeloma and stem cell transplantation for both haematological malignancies and solid tumours. The clinical stem cell program is closely linked to the Peter Mac Stem Cell laboratories which has research groups involved in blood, skin, neural, mesenchymal, gut ADULT stem cells and stem cell plasticity. A number of clinical trials are being 'translated' from the laboratory research work. Most recently he has developed clinical trials for expansion of blood stem cells and immunotherapy for a variety of tumours through the Cancer Immunology research program at Peter Mac.

He also has major interests and expertise in blood clotting and bleeding disorders and transfusion medicine. He has an international reputation for his clinical and basic research work, teaching of undergraduate, postgraduate and specialists. He has published over 200 manuscripts and is on academic and industry editorial and advisory boards.

Rotarians are encouraged to use **THE GEN** as a means of sharing information about Rotary coming events and news. Your item can be emailed to heubergd@anz.com Preferred deadline Friday 5pm..

President Jan Hill

Please note our distinguished Rotarian Jan Hill will take the chains of office from our outstanding current President Sam Binstock. To mark this occasion please mark 6 July in your diaries as our CHANGEOVER NIGHT. Partners and guests welcome!

Rotary's Incoming President Ray Klinginsmith (right) together with his year's logo (left) Building Communities—Bridging Continents

Building Communities -- Bridging Continents

After taking the stage to the tune of "California, Here I Come," **RI President-elect Ray Klinginsmith** announced the 2010-11 RI theme

Building Communities -- Bridging Continents,

during the opening plenary session of the 2010 International Assembly . Klinginsmith said he arrived at the theme after reviewing RI themes of years past. He noticed that only a few spoke to non-Rotarians. "As a result, I decided to search for a briefly stated theme that would fulfill two objectives: the first to explain Rotary to non-Rotarians, and the second to validate our work for Rotarians," he said. "The words I have selected to describe Rotary's current mission and to highlight our achievements are what we do best: *Building Communities -- Bridging Continents.* " The president-elect described how his 50 years of Rotary experience have contributed to his focus on communities at home and abroad. For example, as a Rotary Foundation Ambassadorial Scholar, he studied for a year in South Africa, becoming the first student from his small town of Unionville, Missouri, USA, to study abroad. The timing of the theme announcement, which took place in the evening, was a break in tradition from past assemblies and a reflection of Klinginsmith's willingness to embrace change. He encouraged district governors-elect to reexamine traditional procedures that were no longer best practices and to begin new traditions where appropriate. He also paid homage to Rotarians of the past who helped raise Rotary to a place of prominence on the world stage. He urged district governors-elect to meet the past RI presidents and other former officers in attendance to deepen their connection to Rotary's past.

This is **NOT** the Editor, but finally after a big night on the red carpet and winning a gold logie our favourite Rotarian has finally revealed his true calling and nom de plume. The strong man has gone "flamin' strewth" for 22 years as Alf Stewart portrayed by Ray Meagher. A strong performance in Rotary and acting for so long?
